

Acuity Brands Product Application

Intended Audience

This seminar is intended for those that have lighting and controls experience, but lack experience in the application of products. Contractors, distributors, end users or others that need to improve their application skills.

Description

During this 1.5 day program, students will participate in an interactive approach to real world lighting and controls applications for interior and exterior spaces. Lecturers provide basic product information and how to apply products. As a group, students will complete a lighting layout and report their recommendations to the class.

Learning Objectives

- Apply smart lighting and control solutions to typical commercial applications
- Explain the development of LED and how it impacts the use and applications of product
- Navigate Visual (Acuity software solution for lighting and controls) and how to apply it for specific applications

Continuing Education

This seminar will qualify for 13 professional development hours (PDH).

Seminar Costs:

Acuity Brands will cover: Meals and transportation during the event and return travel to the airport, if needed. Two nights lodging (night before and during event). Travel to greater Atlanta area and travel from airport to hotel will be participant's responsibility. Return flights should be scheduled after 4:45 pm.
